

DuPont Crop Protection

DUPONT™ ESCORT® XP HERBICIDE

DUPONT™ ESCORT® XP HERBICIDE

EPA Reg. No. 352-439

GENERAL INFORMATION

ESCORT® XP may be used for general weed and brush control, and for the control of certain noxious weeds on noncrop sites, ditchbanks of dry drainage ditches, and for selective weed control in certain types of unimproved turf grass. Do not use on irrigation ditches.

ESCORT® XP may be applied on conifer and hardwood plantations, and noncrop sites that contain areas of temporary surface water caused by the collection of water between planting beds, in equipment ruts, or in other depressions created by management activities.

It is permissible to treat intermittently flooded low lying sites, seasonally dry flood plains and transitional areas between upland and lowland sites when no water is present.

It is also permissible to treat marshes, swamps and bogs after water has receded as well as seasonally dry flood deltas. DO NOT make applications to natural or man-made bodies of water such as lakes, reservoirs, ponds, streams and canals.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

TANK MIXES

ESCORT® XP may be tank mixed with other herbicides registered for the use sites described on the Section 3 Federal product label. Use only those tank mix partners which are labeled for the appropriate use site. When tank mixing, use the most restrictive label limitations for each of the products being used in the tank mix.

ADDITIONAL WEEDS CONTROLLED

1 to 2 ounces per acre

Greasewood	Purple scabious
Lupine	Sulphur cinquefoil
Old world climbing fern (<i>Lygodium</i>)	Wild Iris

1 1/2 to 2 ounces per acre

Wild parsnip

NATIVE GRASSES

IMPORTANT PRECAUTIONS

- Grass species or varieties may differ in their response to various herbicides. DuPont recommends that you first consult your state experimental station, university, or extension agent as to sensitivity to any herbicide. If no information is available, limit the initial use of ESCORT® XP to a small area. Components in a grass seed mixture will vary in tolerance to ESCORT® XP, so the final stand may not reflect the seed ratio.

- Under certain conditions such as heavy rainfall, high pH, prolonged cold weather, or wide fluctuations in day/night temperatures prior to or soon after ESCORT® XP application, temporary discoloration and/or grass injury may occur. ESCORT® XP should not be applied to grass that is stressed by severe weather conditions, drought, low fertility, water-saturated soils, disease, or insect damage as grass injury may result. Severe winter stress, drought, disease, or insect damage before or following application also may result in grass injury.

**IMPORTANT
BEFORE USING DUPONT™ ESCORT® XP
HERBICIDE, READ AND FOLLOW ALL
APPLICABLE DIRECTIONS, RESTRICTIONS
AND PRECAUTIONS ON THE
EPA-REGISTERED LABEL.**

Read the Limitation of Warranty and Liability on the Section 3 Federal product label before buying or using THIS product. If terms are not acceptable, return the unopened package at once to Seller for full refund of purchase price paid. Otherwise, use by Buyer or any other User constitutes acceptance of the terms of the Limitation of Warranty and Liability on the Section 3 Federal product label.

This bulletin contains new or supplemental instructions for the use of this product, which does not appear on the EPA-registered package label. Follow these instructions carefully. This labeling must be in the possession of the user at the time of application.
